Experienced Software Engineer with over six years of expertise spanning Machine Learning, DevOps, Software Development, and Testing. Proficient in LLMs, Prompt Engineering, CI/CD, and backend development. Adept at delivering end-to-end ML/AI solutions, optimizing software pipelines, and implementing robust DevOps and Automation strategies. Passionate about driving innovation and contributing to dynamic technology teams to support organizational growth.

Erfahrung

10.2023 - 06.2025

MLOps Engineer

GetItDone Technologies GmbH

- Designed a scalable API layer (Python Flask) to interact with GPT-4o, accelerating conversational AI integration and reducing customer support query resolution time by 35%.
- Built FastAPI services for deploying ML models like YOLO, integrated with Kubernetes and Docker.
- Led prompt engineering initiatives with GPT-3.5 & GPT-4o, enhancing chatbot accuracy and user satisfaction, resulting in 20% increase in task completion rates on frontend apps.
- Handled end-to-end MLOps pipeline design from data ingestion to deployment.
- Collaborated with cross-functional teams to align model deployment with business goals, ensuring on-time delivery of 3+ major ML features.

10.2023 - 06.2025

DevOps and Automation Engineer

GetItDone Technologies GmbH

- Created robust CI/CD pipelines with GitLab-CI, reducing deployment errors by 60% and test feedback cycles by 40%.
- Developed comprehensive Postman test suites (JavaScript) for API monitoring, increasing system reliability with 98% test coverage.
- Automated data anomaly detection and data quality checks using SQL and Metabase, reducing manual inspection time by over 70%.
- Supported DevOps practices, including version control, test automation, and deployment workflows.
- Implemented real-time alert systems via Slack and email, cutting issue resolution time by 50%.

10.2023 - 06.2025

Senior ETL Software Quality Assurance Engineer

NTT Data Global Delivery Services

- Led a 3-member team in migrating ETL workflows from Eclipse to a Java-based insurance platform, successfully delivering the project 2 weeks ahead of schedule and reducing report generation latency by 35%.
- Conducted comprehensive QA for large-scale data warehouse systems, improving data accuracy by 97% through systematic regression and performance testing (SQL, SAP BO).
- Utilized Redgate tools and SQL scripting to validate and optimize data pipelines, contributing to a 30% reduction in ETL errors.
- Spearheaded automation of repetitive test scenarios, improving test cycle efficiency by 45% and cutting manual effort by over 120 hours/month.

Ausbildung

- 10.2021 - 09.2023

Masters in Applied Computer Science

SRH Hochschule Heidelberg
- 08.2014 - 07.2018

Bachelors in Information Science

SJB Institute of Technology VTU Bengaluru
- 06.2012 - 03.2014

Pre - University: Computer Science

SKCH Bengaluru
- 06.2011 - 03.2012

High school: Computer science

Carmel School Bengaluru

Fähigkeiten

AI/ML	MLOps, Prompt Engineering, Agentic AI(n8n)
LLMs	Openai, Gemini, Deepseek
Devops	CI/CD , GitLab CI, GitHub Actions
Containerisation/Orchestration	Docker, Kubernetes
Version Control	Git, Gitlab
Backend Programing Language	Python
Frontend/Frameworks	Flask, Vuejs
API Monitoring	Postman, Swagger
Database	Postgres, MySQL
Scripting	Bash, Shell , Python
Operating System	Linux, Windows
Cloud	AWS, Azure
Software Development Methods	Agile , Scrum
